

## Project Metadata Tool

Shalin Brahmbhatt

Supervised by Dr. Heather Madray, Dr. David Beede, James Kriebel

Center for Enterprise Dissemination

# Introduction

- **Center for Enterprise Dissemination**

- Assures that the Census Bureau can effectively disseminate the maximum amount of high-quality data about the Nation's people and economy
- Protect the confidentiality of respondents and the information they provide
- Facilitates access to restricted-use data

- **Project Metadata Tool**

- Seeks to match external FSRDC (Federal Statistical Research Data Center) research projects with publications
- Began as a CDF project in 2021 and continuing into 2022, potentially 2023

# Motivations

## Make Projects Publicly Visible

- Publishing research project metadata
- Centralize location to view FSRDC projects and outputs
- Surfacing publications from the research projects (not the restricted data!)

# Motivations

## Highlight Census Research

- Two types of research
  - External and Internal
- External research:
  - Approval from Census Bureau
  - Restricted data usage
  - Identifying data presented in the research

# Truth Deck

- Prior to this project, the data had to be input manually
- Compare the abstracts and validities of research projects and publications by hand
- Approve or deny the pair of papers
- Hundreds of research projects to select from
- Thousands of publications from public sources per research project

# Scoring Mechanism

- How can we quantify the similarity between a research project and an associated abstract?
- Create a score to assign each publication, human-readable format
  - Start with the authors, title, and abstract
  - Work through different methods of analysis
  - Utilize the TruthDeck

	Proj ID	Total Score	Author Score	Title Score	Abstract Score	Authors	Matches	API	Title
	<input type="text" value=""/>							<input type="text" value=""/>	<input type="text" value=""/>

Project ID 5: Impact of Foreign Trade on the U.S. Economy

# Document Similarity Methods

- Keyword Search
  - Finding most prominent keywords in the abstracts of the research projects
  - Comparing to publication abstracts
- Natural Language Processing
  - Cosine Similarity
  - Understand the context of phrases and sentences in the research project
  - Scores the similarity of a given piece of text
